MEMORANDUM FOR: Lt. General Lincoln D. Faurer, USAF
Director, National Security Agency/
Chief, Central Security Service

SUBJECT: Note of Appreciation

Line -

1. A group from my staff has just completed a specially tailored three-day seminar at the National Cryptologic School. Those who attended the seminar benefited from the broad exposure to NSA activities. In addition to being consistently interesting, I have been told that the course was well-balanced and well-organized. Your staff deserves kudos for their effort, particularly because the seminar was put together on very short notice. Although a number of NSA people participated, I would like to single out several for special mention: [] Dean STAT of the Cryptologic Management Department, who originally suggested the course; [] from his office, who arranged the curriculum, STAT selected and prepared the speakers, and worked closely with my staff to coordinate the administrative details; and [] who provided STAT considerable help with the arrangements. All this was done under the supervision of [] who also offered interesting insights STAT during the three days, and [] Everything was handled STAT extremely well.

2. This initial seminar was undertaken with the idea that if it proved useful NSA would run it again for others on the IC Staff who should know more about SIGINT operations. It was very successful. To ensure that the next running will benefit from the reactions of the participants, we are preparing, at your staff's suggestion, detailed comments that we will forward directly to the National Cryptologic School early next week. I know already that members of the seminar liked particularly the case study approach used by most of the speakers. By relating specific applications to real issues, the briefers made the contribution of SIGINT easy to understand. The group also considered their session with [] a real highlight. Her willingness to STAT discuss difficult subjects and her candor impressed them all. I will STAT thank [] personally the next time we talk.

3. I am very pleased that this seminar worked so well. It is to our mutual advantage for the IC Staff to understand better the work that you at NSA are doing.
